

We are very concerned about what Sinclair is planning to do to force stations to air Republican propaganda shortly before a critical election.

This is shameful, un-American, and should not be allowed. If they are going to air Republican anti-Kerry propaganda, they should give equal time to anti-Bush propaganda, like "Fahrenheit 9/11".

Sinclair tried to block their stations from airing Ted Koppel's Nightline show last spring when he read the names of the soldiers who had died in Iraq.

Sinclair is shamefully partisan and uses its broadcast license for unethical partisan electioneering.

You at the FCC are supposed to protect the interests of the American people and should not be partisan yourselves or bowing to this blatant corporate abuse of the trust you have given these TV and radio conglomerates.
